Summary

I am a dedicated Full-Stack Software Engineer with a passion for building scalable, high-performance applications. With expertise in programming languages like Go, Java, Javascript, Python, Golang, C, and C++.

I focus mainly on creating responsive and Production-Ready web applications using frameworks like: React and Nextjs, and ensure seamless integrations across services.

I thrive in solving complex challenges and focus on writing clean, efficient code that enhances system reliability and performance.

Always eager to learn and improve, I enjoy collaborating with cross-functional teams to deliver innovative, user-centered solutions that drive business value.

Skills

Golang, Java, Python, JavaScript, React, Nextjs, C, C++, TailwindCSS, Supabase, SQL, PostgreSQL, Node.js, APIs, Vercel, Git, GitHub

Experience

Sila Marketing Agency

Software Engineer • Algeria, Algiers

01/2024

- Led the design and development of three different versions of the Marketing Platform architecture in Golang to enhance performance and deliver marketing services to 2K+ users.
- Integrated cloud services to maintain solid infrastructure across the entire project, which saved my manager a 70% amount of money from other services.
- Communicated with clients about their SaaS projects and helped more than 10 clients design and solve issues related to their software applications.
- Integrated Online payment gateways to facilitate the payment process for clients and led to achieve more than 1000\$/week.
- Collaborated with my developer colleague in a Node.js Backend to solve an issue related to currency conversion as well as designing a chat feature for the support team to communicate with clients, which led to a 30% increase in user engagement.
